

Brief on

(Reflections on 'The Self')

a Poetry Book

Dr Mohamed Buheji

The Self has a conversation with the soul ... and the most important thing in the soul is a hadith about parents and their righteousness .. Then comes after that a conversation about a great moral value in our nation called "Palestine" that we plant among our journey, so that children may inherit it even in our graves..

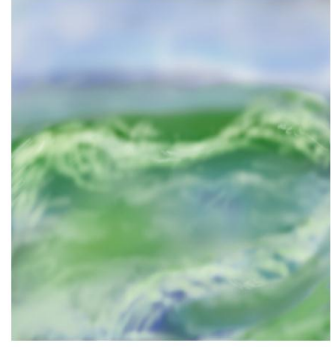

The narration of the Self to the soul is the most important thing that occurs in the era of crisis, about strife and sectarianism .. The talk of the soul in the era of crisis is the most important thing about the practices of inspiration..

The speech of the soul is simple words for everyone who talks about it on tracks like this ... and for choices like this ... and for decisions like this..
